Eventually I'll get paid as an in home care giver but it might take a few more months. Money is really tight so I just ordered one bottle this month. Unfortunately I have to try another brand. Lazerus oils gives a 60% discount for disabled people so I get 120ml for 80 dollars. It basically will cost me 40 dollars a month. I think your product is great but our household is low income so I have to save where I can. If for any reason it doesn't work I'll be back. I appreciate the trial period your company offered we had never tried CBD before so thank you for allowing us to participate.

Dr amazed by interaction. Reports better behavior after increased AM serving. Family reports less moody and more social	Added 25 mg AM serving and adjusted time to 6:30	I haven't ordered yet bc we've had some issues with Morgan and some of her other meds. They were causing suicidal comments and actions at school so we've had to do some med changes there and have really just been trying to monitor that as closely as we can. We truly did love seeing the benefits that Pebble gave her but I haven't been able to focus on that right now. Hopefully when we get her and her meds stabilized I can get an order placed.
